

SUSTAINABLE REFRIGERATION

Follett Scientific's family of high performance, cold storage products reflect our commitment to a more sustainable lab environment. All products are engineered to reduce energy consumption and ozone depleting emissions without sacrificing performance. With capacities ranging from 25 cu ft to 72 cu ft, Follett offers a full line of certified, environmentally friendly cold storage solutions.

EPA SNAP compliance

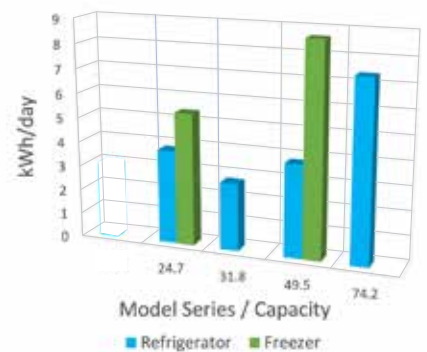

All Follett Scientific refrigerator and freezer models are SNAP compliant utilizing R290 eco-friendly refrigerant

Advanced design features

High density foamed in place insulation (Kyoto Protocol compliant), efficient low velocity high-volume airflow design for fast temperature recovery, robust magnetic door gasket, and LED lighting

Low Energy Consumption
